

**Faith CHAN**

*School of Geographical Sciences, University of Nottingham Ningbo, Ningbo, China*

Faith Ka Shun Chan is an Assistant Professor at the University of Nottingham, Ningbo campus, China. He currently conducts research on international water management practices, with a particularly focus on flood risk management in East Asian mega-deltas and coastal megacities. He has worked as a teaching assistant in the School of Geography at the University of Leeds, was a chair of the water@leeds postgraduate forum. He has a strong research and teaching interests on inter-disciplinary aspects on environmental management across physical and human geography, in particular on issues related to sustainable water and soil management and development. He has worked with the United Nations and University of Bonn on sustainable dryland environmental management in Uzbekistan funded by UNSECO. Currently, he is based in Ningbo, China and aims to work further on projects concerning flood risk management, water resources management, soil management and climate change adaptations in Asia and the Pacific region.
