

## **General Election 2017 – BG President**

### **Mission statement of Dr. Naishen LIANG**

AOGS is a very international organization. I have been promoting several international joint research projects between Japan and other Asian countries (Malaysia, Thailand, Korea, China, Taiwan, Hong Kong) on terrestrial ecosystem carbon cycle. With long experience of AsiaFlux committee member, I have a comprehensive communication with Asian and worldwide colleagues. It is my strong belief that communication is a fundamental and critical parameter to enhance the understanding among the section president, AOGS council and memberships. If I am elected as the Biogeosciences (BG) section president, I, together with the BG president(s) and secretary, will work with BG scientists at both AO regional and global levels. Having born in China, living in Japan and doing research in Asian region, I am comfortable in different scientific cultures and am truly passionate about international cooperation in science. It would be a great honor for me to represent BG at AOGS.
