

Mamoru Miyamoto PhD

Researcher

International Centre for Water Hazard and Risk Management (ICHARM)

under the auspices of UNESCO

Public Works Research Institute, Japan

Mamoru Miyamoto earned a master's and doctoral degree in Hydrology from Chuo University in Tokyo and is currently a researcher at the International Centre for Water Hazard and Risk Management under the auspices of UNESCO. He has been active worldwide particularly in the area of flood management, taking advantage of his hydrological expertise. He has abundant experience in taking a central role in information networking through the International Flood Initiative (IFI) activities and implementation of international projects such as flood forecasting and warning system installation, capacity development of local stakeholders and disaster education in various countries e.g. Bangladesh, Indonesia Malaysia, Philippines and Thailand. He has also published peer-reviewed papers on flood modeling and forecasting in academic journals and delivered workshops and presentations at various international settings.
