Mission Statement for the Secretary General of AOGS

As Secretary General of the Asia Oceania Geosciences Society (AOGS), my mission is to work in close partnership with the President to drive AOGS toward a future of sustainable growth, impactful scientific contributions, and enhanced collaboration both within and beyond the region. Recognizing the critical role of the Secretary General in shaping AOGS's strategic vision and operations, I am committed to advancing the society's goals through inclusive leadership, strategic foresight, and effective implementation.

Key Focus Areas:

1. **Strengthening AOGS's Distinct Identity**
   Foster AOGS's unique role in the global geoscience community by emphasizing its regional focus on Asia and Oceania while collaborating with other international organizations, AGU, EGU, TCGU, and JpGU. Develop distinctive programs and initiatives that highlight AOGS's strengths and relevance.
2. **Fostering Scientific Exchange**
   Strengthen AOGS's role as a hub for scientific collaboration by fostering meaningful interactions among researchers. To achieve this, we will actively invite the participation of leading scientists in key fields, ensuring their expertise enriches the society's activities. Additionally, we will organize special sessions on critical and emerging topics, providing a focused platform to address major challenges and promote innovation.
3. **Driving Internal Structural Reform**
   Support the establishment of an Executive Director role to enhance professional leadership and operational efficiency. Establish a firm relationship with the administration office to ensure greater independence and alignment with AOGS's strategic priorities. Develop a sustainable financial and operational model underpinned by robust management practices.
4. **Activation of Early-Career Researchers and Graduate Course Students**
   Foster the next generation of geoscientists by creating tailored programs and initiatives that support early-career researchers and graduate students. These may include mentorship schemes, funding opportunities, professional development workshops, and platforms for showcasing their work. Actively involve this group in AOGS activities to ensure their perspectives and innovations contribute to the society's growth.
5. **Preparation for AOGS 2026 in Fukuoka**
   Leverage the presence of Japanese members in the Council to ensure the success of the Fukuoka meeting. Work closely with the SG Elect to deliver a world-class program while enhancing AOGS's visibility and impact in the region.

Through these initiatives, I aim to enhance the values of AOGS, support its members, and contribute to its continued growth as a leading organization in the geosciences. Together with the President and the Executive Committee, I will work to balance innovation and tradition, positioning AOGS as a beacon of scientific excellence and collaboration.
