This paper provides a background information on the development of Capacity Building on IWRM in Malaysia. An IWRM Capacity Building network exist on a global scale in the form of CapNet. MyCapNet is the Malaysian Support initiative of Malaysia Water Partnership (MWp) for CapNet.

MyCapNet aims to develop a strong Capacity building network in the country to achieve its objective through networking, awareness creation, training and education, development of relevant material in the IWRM sector.

The role of public sector, NGOs and the involvement of Local Institution of Higher Learning on IWRM Capacity Building also included in this paper.

This paper also explain the activities carried out by MyCapNet for IWRM Capacity Building in Malaysia since its formation and the future outlook.
