

NAT GOPALSWAMY

Dr Nat Gopalswamy is an astrophysicist with NASA's Goddard Space Flight Center. His major interest is solar eruptions (CMEs, flares) and their impact on Earth's space environment. Dr. Gopalswamy has authored or coauthored more than 300 publications and edited five scientific books. He is the current President of IAU Commission 49 (Interplanetary Plasma and Heliosphere), a SCOSTEP Bureau member, and the International Coordinator of ISWI. He received the 2008 Robert H. Goddard award for scientific achievement. His education is from the University of Madras (BSc and MSc) and the Indian Institute of Science in Bangalore (PhD).
