Principal Investigator

KENJI NAKAMURA

Professor, Hydrospheric Atmospheric Research Center,
Nagoya University
Furocho, Chikusaku, Nagoya 464-8601, Japan

EDUCATION

1972: B. S. Degree in Geophysics, University of Tokyo

1974: M. S. Degree in Geophysics, University of Tokyo

1978: Ph. D. in Geophysics, University of Tokyo

TITLE-POSITION

1977-1987	Scientist, Satellite Communications Section, Kashima Space Research Center, Radio Research Laboratory (present: Communications Research Laboratory, Japan)
(1985-1987)	Universities Space Research Association resident associate at NASA/Goddard Space Flight Center, Greenbelt, MD, USA
1987-1990	Microwave Remote Sensing Section, Applications Division, Communications Research Laboratory
1990-1993	Section Chief, Earth Environment Section, Kashima Space Center, Communications Research Laboratory
1993-1994	Section Chief, Microwave Remote Sensing, Earth Environment Division, Communications Research Laboratory
1994-2001	Professor, Institute for Hydrospheric-Atmospheric Sciences, Nagoya University
2001-2005	Professor, Director, Hydrospheric Atmospheric Research Center, Nagoya University
2005-present	Professor, Hydrospheric Atmospheric Research Center, Nagoya University
April 2011-	Director, Hydrospheric Atmospheric Research Center, Nagoya University

RESEARCH ACTIVITIES

His doctorate thesis is on a theoretical investigation of the wave-mean flow interaction. After joining the Communications Research Laboratory, Japan, he engaged in a space to earth radio propagation experiment using geostationary test satellites. The studies evolved into microwave remote sensing technique, especially rain radar technique. The study included multi-wavelength and dual-polarization radar techniques. During two-year stay at NASA Goddard Space Flight Center, he performed an airborne dual-wavelength rain radar experiment which provided invaluable result for the current Tropical Rainfall Measuring Mission (TRMM) and future spaceborne rain radar development. Currently, he is engaged in the TRMM project and the Global Precipitation Measurement (GPM) project. He has also led the Lower Atmosphere and Precipitation Study (LAPS) project of JST/CREST for 2001-2006. The objective of LAPS was to clarify the interaction between the planetary boundary layer and precipitation system.
