

## **KENJI JINNO**

I was born in Nagasaki, Japan in 1947. I received the B.S. degree in 1970 and Doctorate Degree in 1979 from Kyushu University. Since I was a batcher student, my interesting subjects have been groundwater, solute transport, hydrology, and water resources. In 1987, I had an opportunity to stay in Lund University, Sweden. Since then, the collaboration still continues; exchanging students and researchers. In 1991, ha was promoted to Professor of Kyushu University. Recently, I am working on the numerical modeling for biogeochemical process and solute transport which is important for better environment management of groundwater and water resources.
