

GORDON CHIN

Dr. Chin has over thirty years of experience with NASA. He is currently the Associate Project scientist for LRO and a Co-Investigator for the LEND instrument. He has served as the past Chair and member of the ALMA Management Advisory Committee. He was the Project Scientist for SWAS. He has worked on submillimeter receivers, optically-pumped lasers, and acousto-optic spectrometers. He has observed planetary and cometary atmospheres using ground-based observatories and performed radiative transfer and line emission calculations for these environments. He has papers on experimental control of chaotic systems and image restoration. He received the Ph.D and B.A. degrees in Physics from Columbia University.
