

Narendra BHANDARI
Physical Research Laboratory

Professor Narendra Bhandari is a planetary scientist. He has effectively applied many physics based techniques in problems in geosciences, meteorites and Moon. He took a leading role in Chandrayaan-1 mission for exploration of Moon.

For his research, he has been honored with many awards including Sarabhai Award for Planetary and Space Sciences, National Mineral Award by Government of India and Certificate of Special Recognition by NASA. He has edited and published several books on lunar science. "The Mysterious Moon and India's Chandrayaan Mission" is very popular and has been translated in several Indian languages. He served as President of International Lunar Exploration Working Group.
