

## **Stephan ULAMEC**

*Head Rosetta Lander, German Aerospace Center, Space Operations and Astronaut Training*

S. Ulamec has more than 20 years of experience in the development and operations of space systems and instruments. After finishing his PhD at the University of Graz (Austria), 1991, he worked as a Research Fellow at ESA/ESTEC until 1993 and is since then at the German Aerospace Center, DLR, in Cologne.

Besides of his activities in system engineering and project management of the Rosetta Lander, Philae, he is engaged as payload manager of MASCOT for the JAXA Hayabusa 2 mission. He is involved in various studies for in-situ packages for space research as well as the definition and performance of tests for various mechanisms and surface packages to be operated on planetary surfaces.
