

**Robin ROBERTSON**

*University of New South Wales, Canberra, Australia*

Dr Robin Robertson is a Senior Lecturer in Physical Oceanography at the University of New South Wales at the Australian Defence Force Academy. She researches ocean mixing and its impacts, particularly those of tides and internal tides and waves. She has done much of her research in the Antarctic and received that Antarctic Service medal from the US National Science Foundation. She received her PhD from Oregon State University and was a Doherty-Associate Research Scientist at Lamont-Doherty Earth Observatory for seven years, if her post-doc there is included, before emigrating to Australia and taking a teaching position at UNSW Canberra.
