

Peter CLIFT

Charles T. McCord Endowed Professor, Louisiana State University

Peter Clift is McCord Professor of Petroleum Geology at Louisiana State University and has worked on the geology of SE Asia for 20 years, focusing on the sedimentary geology of the South China Sea and the development of river systems in response to the evolving monsoon and topography of Asia after India-Asia collision. Clift is a graduate of Oxford and Edinburgh Universities and hold visiting positions at MIT, the South China Sea Institute of Oceanology (Guangzhou) and the Woods Hole Oceanographic Institution. He is a fellow of the Geological Society of America and was recipient of the Geological Society of London Murchison Prize.
