

**Ir Nor Hisham BIN MOHD GHAZALI**

*Director, Division for Water Resources and Hydrology*

Ir Nor Hisham Bin Mohd Ghazali holds a B. Sc. in Civil Engineering from California State University (Chico) and a Masters in Coastal and Maritime Engineering from Universiti Teknologi Malaysia. He joined the Department of Irrigation and Drainage Malaysia (DID) in 1987 starting as a soil investigation engineer and later joining the Coastal Engineering Division where he served until 2008. His subsequent appointments were as Deputy Director of Selangor State Department of Irrigation and Drainage, Director of Operations at the Stormwater Control Center, Kuala Lumpur Stormwater Management and Road Tunnel (SMART) and Director of Johor State Department of Irrigation. In March 2016, he was appointed to the directorate as Senior Director (Management Sector) to oversee ICT and human capital development. In January 2017, Hisham was appointed the Director of Division for Water Resources and Hydrology.

Hisham's technical specialisation is erosion control and he was a project leader for the Malaysian Government's coastal erosion and shoreline management programme between 2002 and 2008. However, since 2008, his skills have expanded into water resources particularly flood management, hydrological networks and early-warning systems. His current key role is to oversee the ongoing projects in developing the Malaysian Government National Water Balance System and National Flood Forecasting Center.
