

**I-Te LEE**

*Central Weather Bureau*

Dr. I-Te Lee is a researcher at the Meteorological Information Center of Central Weather Bureau (CWB) in Taiwan. Dr. Lee received his M. S. and Ph. D. from the Institute of Space Science, National Central University, Taiwan in 2008 and 2013, respectively. His research interest is focusing on ionospheric physics, radio science, and numerical ionosphere-thermosphere model simulation. Now, he is in charge of preparations for space weather operations office in CWB to provide space weather operational service to local user and continue developing ionospheric data assimilation system.

Dr. Lee participated outreach education activities for space sciences with Prof. Jann-Yenq (Tiger) Liu since 2005, and became a frequent speaker to illustrate knowledge of space science and technology, and introduce influences caused by space weather. He has extensive experience in delivering lectures and workshops to a wide audience ranging from elementary school students to the general public.
